Light snow	Sunny intervals	Sleet showers	Heavy rain showers	Sleet showers	Light snow
Precipitation probability					
50%	40%	60%	70%	60%	50%

Forecast for Tuesday 04 May 2021

Weather: Westerly winds will moderate during the early hours, but gusts will continue to reach gale force throughout the morning. The strong winds will bring frequent showers across the park during the early hours, with these falling as sleet or snow across the highest peaks. During the day we will see little change, with further showers, which may turn heavy at times, with a risk of hail and also possibly thunder at times. Showers will continue into the evening, but by this stage winds should be below gale force.

Chance of cloud free mountain/hill tops above 600m: 70% but decreasing to 40% later in the evening.

Visibility: Generally very good away from showers, but falling to moderate during rain showers and poor during any sleet or snow showers. Cloud bases are likely to lower to around 500m during the passage of showers, obscuring views from the tops, with cloud bases also lowering more widely to 500m during the late evening.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Winds likely 10-15mph stronger then shown at 600m at times across highest peaks. Severe wind chill likely on peaks early in the day.

Recent rainfall: measured at Neuadd: altitude 353m

Recorded at	Last 24 hours:	Last 48 hours:	Last 72 hours:
02:00 on Mon 03 May 2021	1.4mm	8.2mm	10.8mm

Forecast for Wednesday 05 May 2021

Weather: Another cold day with scattered showers, with the risk of some hail at times. In-between the showers, some clear/sunny spells will develop. Winds will be lighter, which may help it feel slightly less cold than Tuesday.

Maximum wind: Westerly 20mph gusting 30mph.

Chance of cloud free mountain/hill tops above 600m: 40% rising to 70% during the morning, then 90% by the afternoon.

Visibility: Generally very good away from showers, but falling to moderate during the passage of showers. Cloud bases are to be around 400m during the early hours, before gradually lifting above the summits during the morning. Cloud bases may temporarily reduce to 600m during the passage of showers, obscuring the views from the tops of the mountains.

Temperature: **Valleys:** Plus 03 Celsius to Plus 12 Celsius
At 600m: Minus 02 Celsius rising to Plus 02 Celsius
Freezing level: Initially around 750m but rising above the summits during the morning
